

Congratulations on one hundred years of ophthalmic publishing

Hugh R Taylor

It is a particular pleasure professionally and personally to be able to congratulate the *British Journal of Ophthalmology* on successfully reaching its 100 year anniversary. What a wonderful achievement.

I first learnt about the *Journal* nearly 50 years ago at the very start of my career in ophthalmology. While the *BMJ* was called the *BMJ*, the *BJO* was *The British Journal*. I remember with great pride in 1977 when my first paper was published in the *BJO*. It was also with great pleasure that I served on the Editorial Board for some years in the late 1990s.

Correspondence to Professor Hugh R Taylor, President, The International Council of Ophthalmology, The University of Melbourne, Melbourne School of Population Health, Level 5, 207 Bouverie Street, Carlton, VIC 3103, Australia; h.taylor@unimelb.edu.au

The longevity and consistent high quality of the journal is quite outstanding and sets it apart from many other publications. Over the years for different reasons, I have delved back into time exploring old issues of the *BJO* from the 1910s and the 1930s where the evolution of the understanding of eye disease and the development of ophthalmology is so well chronicled.

Today, the *Journal* continues to provide top quality reports of cutting edge advancements in the science and treatment of eye disease, and notably includes a wide range of papers that relate to the provision of eye care including issues in developing areas as well. Maybe this is a legacy of the Empire and Commonwealth perspective and concern, but it benefits the whole world.

We all recognise the tremendous changes that are occurring with the digital age and this is as clearly apparent in the publication of high quality scientific journals as it is in other areas. The shape and structure of the *BJO* in another 100 years is hard to guess, but I have no doubt it will build on the success of its first century and maintain its high quality, high relevance and broad representation.

Let me extend my warmest congratulations to the journal and all its staff and to all those who have contributed in so many diverse ways over the years to enable this great milestone to be reached. Well done!
