**HAMBLIN'S
"RIGID FORM" SPECTACLES**

A FRAME FOR ADULTS ON THE LINES OF THE "SCHOLAR" SPECTACLE

**THE "RIGID FORM" SPECTACLE
FRAME**

The above illustration depicts a spectacle frame designed to meet the demand for a type of frame in which the utility of the ordinary frame and the strength and comfort of the "Scholar" frame are all incorporated. The "Rigid form" frame achieves this end and, as will be seen in the illustration, is designed for both strength and comfort without the sacrifice of elegance. As in the more well-known "Scholar" frame the bridge does not rest on the nose, the weight of the frame being taken by the pads on each side of the nose. It is made both in gold and steel and may be thoroughly recommended on account of its strength and appearance.

The Keeler Ophthalmic Equipment.

For years the Oculist has been demanding an inexpensive apparatus combining, in neat and handy form, the equipment requisite for his routine work.

It has been claimed with every confidence that the Keeler Ophthalmic Equipment, which is the result of much careful experiment, exactly fulfils the Oculist's need.

Detailed descriptions of any of these Instruments are available upon request.

SOLE MANUFACTURERS AND PATENTEES,

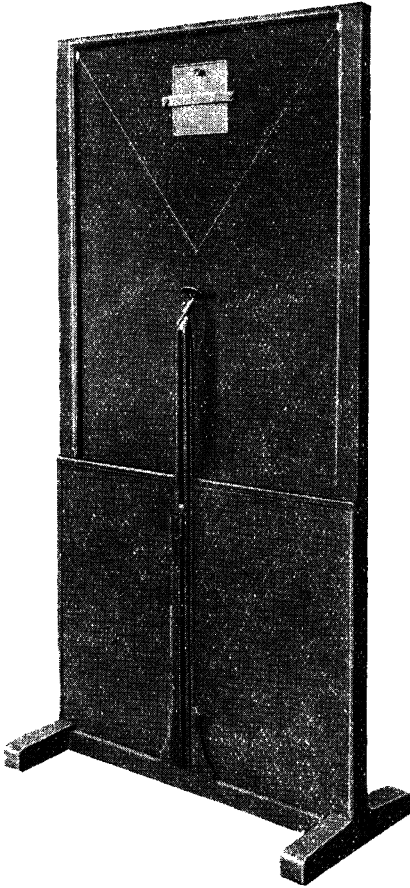

C. DAVIS KEELER,

Oculists' Dispenser and Ophthalmic Instrument Manufacturer,

47, WIGMORE STREET, LONDON, W.1

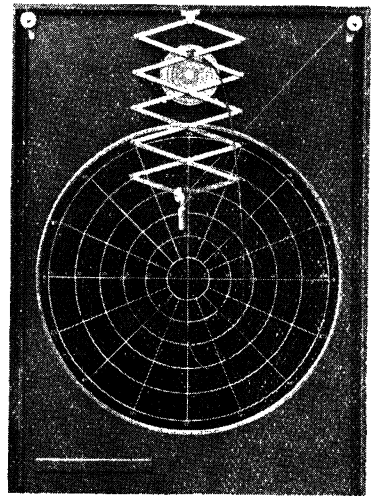

BRANCHES—PLYMOUTH, TRURO and PENZANCE.

THE ARMSTRONG RECORDING SCOTOMETER.

AN ingenious mechanical apparatus designed to improve the value of the Bjerrum Screen by providing a means of charting, with accuracy and rapidity, scotomata occurring in the central portion of the visual field. The area that can be investigated extends from the fixation point outwards to the 30° circle.

Illustrative Booklet sent on application.
