

## **"SCUTOID" SAFETY LENSES**

**SAFEGUARD  
CHILDREN'S EYES  
FROM  
DAMAGE  
IN  
ACCIDENTS**

"Scutoid" safety lenses are in no way distinguishable from ordinary lenses and are ideal for children's spectacles, and for all spectacles where there is a risk of damage to the eyes through breakage.

## The HEAD-BAND BINOCULAR MAGNIFIER

*Provides  
Effective  
magnification  
without eye-  
strain.*

*Good working distance with  
absence of glare.*

*Stereoscopic appreciation of  
objects.*

*Freedom of both hands and  
unrestricted downward vision.*

**F**OR the full appreciation of a magnified image, both eyes must be used as otherwise it is impossible to accurately gauge projections, fissures and contours. The lenses in this magnifier are scientifically ground to a high degree of accuracy, and have a suitable prismatic effect to avoid any eyestrain from continuous use and to preserve a stereoscopic effect.

The focus provides a working distance of about 8 inches, with a wide field of view and a magnification of  $2\frac{1}{2}$ .

It effectively improves on the usual magnifying glass needed in cases of low visual acuity by elderly people.

**C. DAVIS Keeler**  
SPRING FITTING  
**REVERSIBLE  
OCCLUDER**

Ideally suitable for use in a consulting room for Perimetry and Scotometry when interchange of occlusion is required. The spring fitting allows for this interchange without greatly disturbing the patient's hair.

**THE NEWLY PERFECTED PLASTIC**  
**AND GLASS ARTIFICIAL EYE**

combining and enhancing the natural effect of the best quality Soda-Glass they have hitherto used, with the non-shatterable and durable qualities of the Plastic.

---

*Further particulars may be obtained upon application.*

So that we can concentrate  
the whole of our resources on the production of  
essential prescription work, and so be of maximum  
service, we recommend that, for the time being,  
orders for non - essential lenses be deferred.
