THE P.V.C. OCCLUDER

This lightweight inconspicuous Ophthalmic Occluder has been made to the suggestion of Mr. K. H. Mehta of Doncaster.

The illustrations show (1) the occluder as we supply it and (2) cut down to fit an orbit.

The occluder is moulded in Poly Vinyl Chloride, which is hygienic and being soft is also comfortable in wear. The occluder should be worn behind a spectacle correction and the sucker effectively makes the attachment. Ventilation holes are provided.

The P.V.C. Occluder in black or light pink (flesh colour) 4s. 0d.

Further particulars will be gladly furnished upon application to

PROFESSOR
AMSLER'S
QUALITATIVE
VISION TEST
CHARTS

These charts, designed by Professor Marc Amsler of Zurich, make it possible to detect, localise, and analyse the visual functional disturbances (metamorphopsia, relative scotoma) which accompany the beginning and evolution of maculopathies. The word "maculopathy," analogous to "retinopathy," is used by Professor Amsler to express all pathological conditions of the macula which play such an important part in ocular diseases. Many functional disturbances affecting the central and paracentral region of the field escape the usual quantitative test of central vision which does not really bring into account the quality of the visual trouble. By means of these charts and the method and technique of examination described by Professor Amsler such qualitative measurements are easily made.

Seven charts in substantially bound book with set of 50 recording charts on tear-off pad, and full instructions for their use by Professor Amsler

Note.—Spanish, French and German editions are available at same price.

ENGLISH EDITION OF
SJÖGREN'S VISUAL ACUITY
TEST CARDS FOR
CHILDREN
(WASHABLE)

This well known Test devised by Dr. Sjögren of Sweden has not hitherto been obtainable in this Country for use at six metres, nor has it been obtainable in washable form.

With the co-operation of Dr. Sjögren, Hamblins have redrawn the "hands" to subtend the Snellen angle of one minute of arc at SIX METRES instead of five. In this new edition these six cards (6/36 to 6/6) are issued with WASHABLE SURFACES, almost a necessity for anything being constantly handled.

The "VERTEX" DIOPTRESCOPE

OUTSTANDING FEATURES :

- The dioptric power scale, axis finder and prism scale are read from one position without moving the head.
- Back vertex powers can be measured over a range of plus and minus 25 D with a precision of 0.06 D.
- The instrument is calibrated by means of lenses with B.V.P.'s certified by the National Physical Laboratory.
- Prisms measured to 6 D. Simplicity and speed of operation (unskilled operators have in their first test secured an accurate reading of a compound lens in under two minutes.)
- Compact robust design, affording maximum protection and rigidity of the optical elements.
- Available either with or without marking device, in crackle-black or stove-enamelled white finish.

“ Featherweight ”

A fine example of British Craftsmanship

Designed for sheer comfort and especially for the ultra sensitive patient, the “FEATHERWEIGHT” has been constructed to obtain exceptional lightness in weight conjointly with a modern design.

The frame work is made from Turtle-shell which gives this apparently delicate appliance strength and rigidity.

It is produced in our own workshops to carefully recorded individual facial measurements.

NOTE:—Total weight with moderate Rx. Fitted with Plastic Igard lenses 3 drms. 10 grns. or under $\frac{1}{2}$ oz. Fitted with crown glass lenses 4 drms. 40 grns. or just over $\frac{1}{2}$ oz.

THE NEAME EYE SHIELD

As described in the B. J. O., January, 1956.

The eye-shield is attached to the spectacle frame for patients with early or immature cataract.

The eye-shield must be made for the individual so as to fit accurately the curve of the forehead.

It may be used with distance, bifocal or reading glasses and has been of some benefit when the visual acuity was as good as 6/12.

TRIAL CASE TABLE

for the consulting room

Sturdily built of oak or mahogany, this new Trial Case Table, designed to take our Standard or Major Trial Case, is both useful and attractive. An extending writing flap is concealed beneath the large drawer, and the lower shelf provides additional storage space. Being fitted with rubber castors, the table can be moved with ease, even when heavily loaded.

The price of the standard table as illustrated on the facing page is £16 10s. 0d., in oak or mahogany.

DIMENSIONS

HEIGHT 32" · WIDTH 25½" · DEPTH 21" · WRITING FLAP 10" × 21".

The size and design can be varied to suit individual specifications.

resistance.

THE HAMBLIN LISTER-MORTON OPHTHALMOSCOPE

WITH BATTERY IN HANDLE
AND AN ALTERNATIVE
HANDLE FOR USE WITH
MAINS SUPPLY

This ophthalmoscope has a performance that has yet to be surpassed. The lighting system makes possible direct examination of the macular region in a fully lighted room without using mydriatics.

The battery model being self-contained is ideal for bedside examination but operation from the mains is usually preferred in the Consulting Room.

A good arrangement for a busy surgeon is to use the battery model for visiting purposes and to have the interchangeable mains handle for use in the Consulting Room.

**HAMBLIN'S
"G.P."
OPHTHALMOSCOPE**

The shape of the head of this instrument permits it to be approximated easily and comfortably to the examiner's eye. Loring's Wheel of 23 lenses covers most requirements; its simplicity enables it to be moderately priced. The handle, similar to that of Hamblin's Lister-Morton ophthalmoscope, is knurled to afford a good grip. The quick thread on the octagonal cap provides for rapid dismantling. The Lister lighting system, already fully proved in the Lister-Morton instrument, is employed in the "G.P." pattern.

No. 305

**HAMBLIN'S
AURISCOPE
FOR USE ON A
LISTER-MORTON OR
"G.P."
OPHTHALMOSCOPE**

The auriscope head for use with Hamblin's ophthalmoscopes is fitted with an octagonal cap similar to that of the ophthalmoscopes so that the exchange of heads becomes extremely simple; the quick start thread making the operation only a matter of a couple of seconds.

DIAGNOSTIC SETS

"G.P." ophthalmoscopes and auriscopes with diagonal cap to fit the same handle, complete in case, are available. Larger sets incorporating the Lister-Morton ophthalmoscope are also available.

Isophane [★] TRIFOCALS

complete the range of corrected lenses, both single vision and multi-focal, providing the best possible marginal correction

★ The function of a trifocal is to provide clear vision at all distances. The best distance vision can only be obtained by using scientifically computed lenses; BAO flat top trifocals use Isophane curves, in the distance portion, which are computed to correct the innate errors in a spectacle lens to the greatest extent possible in a single piece of glass.

HAMBLIN'S

"ALL-BURIED IMPLANTS"

To diminish the tendency for extrusion so often experienced with earlier implants an all-buried implant was designed.

The illustration shows this implant together with both the under side and the upper side of the retaining shell which is worn after the operation to retain the depression into which the "Mobileye" (an artificial eye specially designed for these implants) will eventually fit.

The Implant can alternatively be supplied made in Acrylic with Tantalum mesh. All are made in normal and children's sizes.

THE FIRST OPTICIAN

ESTABLISHED 1873

GEORGE SPILLER,
Ltd.

41, WIGMORE ST., W.1

Tele.: WEL. 7471-2

March has the reputation of "coming in like a lion" and "going out like a lamb"—or the reverse. Its basic character was clearly recognised by the Anglo-Saxons who called it the "*Hlyd* (storm) *monath*." Whether the month has treated us to roar or bleat, however, few of us will not rejoice that in it spring begins.

The word that springs to mind regarding the Spiller "Ladybird" frame is "Glamour." One of the definitions of this overworked word, according to a dictionary, is "groomed beauty and studied charm." While this may be slightly derogatory when applied to a person it is no insult to this carefully designed frame. In Perspex of various tints.

Spillers "Ladybird" Supra

SPILLER — FOR PERSONAL SERVICE
