Smith & Nephew Pharmaceuticals Ltd., Bessemer Road, Welwyn Garden City, Hertfordshire, United Kingdom.

MAXIDEX

The intensive care steroid for severe ocular inflammations

Maxidex dexamethasone—0.1 %: a potent ophthalmic steroid: the Isopto vehicle to give increased absorption and maximum delivery of the anti-inflammatory agent to the affected area.

MAXIDEX—especially useful in such conditions as iritis, acute and chronic anterior uveitis, cyclitis, thermal and chemical burns, and also post-operatively to reduce inflammatory reactions.

One or two drops of Maxidex, prescribed in accordance with the severity of the condition, will soothe and ease the pain and discomfort of most acute inflammatory eye conditions.

Contraindicated in acute herpes simplex, vaccinia, varicella and most other viral diseases of the cornea and conjunctiva, tuberculosis, fungal disease, acute purulent untreated infections, which like other diseases caused by micro organisms, may be masked or enhanced by the steroid.

It's the Original! It's the «Haag-Streit» Slit Lamp 900

Originals have value in the healing arts as well as in the fine arts. The Haag-Streit Slit Lamp 900 is a prime example.

A product of decades of skill, the Slit Lamp 900 is made by the world's ophthalmological instrument leader. It is in worldwide use. Some 25000 are at work all over the world alone. The 900 has features sometimes imitated but never duplicated; a "joystick" control for one-hand operation, a non-dazzling fixation target and others. It comes with a full line of associated equipment including photographic and depth-measuring devices.

The Slit Lamp 900 is a masterpiece of original instrumentation as are all Haag-Streit products.

If you are ready to make the lifetime investment that owning a true original represents, contact Clement Clarke International Ltd. They will be glad to send you full information on the Slit Lamp 900 and our many other fine products.

Balance is Essential

Alcon's Balanced Salt Solution (BSS) is:-

- Compatible with ocular tissues minimising cytotoxic effects.*
- Convenient to use. 15 ml Steri-Unit with an adaptor plug for a Luer-Lok irrigating needle.
- Contained in an outer blister pack enabling the bottle to be placed on a sterile surface.

Intra-ocular fluid contains principally seven ionic species. Normal saline and Ringers solution contain only two and four of these ions respectively. They are **not Balanced Salt Solutions**. Thus both produce ionic imbalance resulting in trauma to the tissue.*

To prevent cellular damage to ocular tissues you need a solution that is isotonic and physiologic.

Alcon's Balanced Salt Solution.

TWENTY-FOUR GOOD REASONS FOR USING MINIMS™

MINIMS-STERILE, SINGLE-DOSE EYE DROPS

There are twenty-four presentations in the Minims single-dose range. Each one selected for its usefulness in day to day clinical situations.

Minims solutions are sterile and, because of the over-wrap and special cap closure, remain so right up to the moment of application. No preservatives are included in the formulations, so Minims may be used in open eye surgery.
