PERKINS TONOMETER

This instrument employs the same doubling prism principle as the Goldman applanation tonometer and is ideal for use at an early post-operative stage on seated or recumbent patients.

The tonometer is light, compact and portable, the power source being two batteries housed within the handle.

FRIEDMANN VISUAL FIELD ANALYSER

There are many advantages to be gained from using this instrument. It is completely self contained and only one minute is necessary to test the central field for presence of a defect or comparison of macular function. The front of the instrument is removable for dark adaptation tests and additional fronts are available for specialist requirements. You miss less and diagnose earlier with the Friedmann Visual Field Analyser.

THE DIAG[®] SYSTEM

This is a comprehensive but compact diagnostic instrument system which appeals particularly to the contact lens specialist. It has many outstanding properties and is reasonably priced. The DIAG[®] system at present consists of a fibre optic light source, a slit lamp with biomicroscope, choice of eyepieces, a keratometer attachment and a stand with joystick control.

Additional accessories are in the course of development.

TWENTY-FOUR GOOD REASONS FOR USING MINIMS™

MINIMS-STERILE, SINGLE-DOSE EYE DROPS

There are twenty-four presentations in the Minims single-dose range. Each one selected for its usefulness in day to day clinical situations.

Minims solutions are sterile and, because of the over-wrap and special cap closure, remain so right up to the moment of application. No preservatives are included in the formulations, so Minims may be used in open eye surgery.

Get more value from your slit lamp... with Haag-Streit's free book on Slit Lamp Microscopy.

As manufacturers of the original Slit Lamp 900, we want to send you a book on this essential diagnostic instrument that will enhance your skill in working with it.

Within its pages you will find a wealth of information on usage and procedures in slit lamp microscopy that will make you aware of techniques that you have adopted intuitively... and of ways to sharpen your skills and refresh

your knowledge of slit lamp techniques.

The book, available in English only, is by Theodor Schmidt, M.D., of the University of Berne.

Whether you have been in practice for years, or are beginning now to develop your career, this book «On Slit Lamp Microscopy» is one you should own and use... especially if your instrument is a Slit Lamp 900.
