

RAYNER present their new

'Professional' Indirect Ophthalmoscope

Rayner Optical have harnessed the latest developments in engineering and technology to bring you a remarkable new Indirect Ophthalmoscope – The Professional – A totally new indirect with many unique features embodied in the most compact and practical form.

Special Features:

- ☐ Blue Hazard filter protection
- ☐ Small Pupil facility
- ☐ Unique 'Park' mechanism
- ☐ Two Second Observer mirrors that can be swung in individually
- ☐ Cobalt Blue filter
- ☐ Red Free filter
- ☐ Charging System
- ☐ Full Range P.D. adjustment
- ☐ Lightness and comfort
- ☐ Heat Protection for patient and practitioner

The Blue Hazard filter gives you patient protection from those harmful wavelengths in the visible blue area. All pupil facility; three light patch sizes are available. A unique "park" facility which allows for the ophthalmoscope to be moved out of the line of vision when not being used

The second observer mirrors can be simply pivoted into position when required.

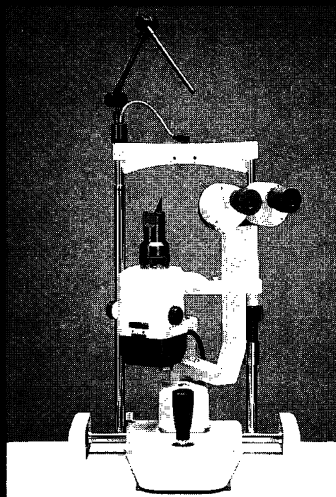

Filter selection – cobalt blue for fluorescence angioscopy AND Red-free for increased contrast when viewing retinal blood vessels, haemorrhages, etc.

A compact power pack with combined holder/charging well for a portable battery unit. P.D. adjustment range 52-74mm. A fully adjustable headband, designed for prolonged wear and comfort. The optical system has been designed to give the optimum viewing and illumination angle. A powerful 6V low halogen prefocused lamp is used.

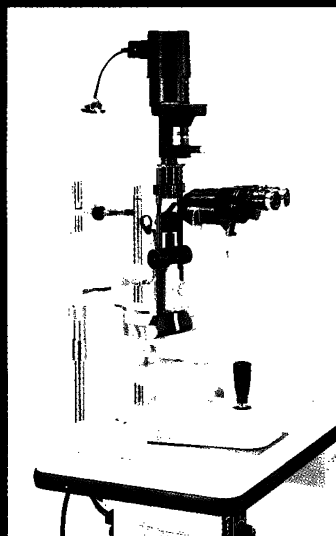

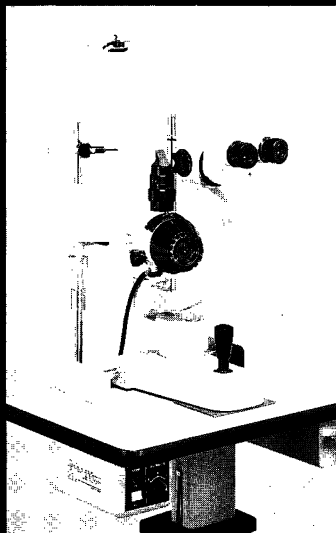

For full details about our range and for our new Catalogue, please contact the Product Information Department

SL-1E

SL-1E

- 14mm slit illumination
- Omni directional joystick
- Variable magnification capability
- Built-in filters
- Halogen illumination

SL-6E

SL-2E

- Convergent binocular tubes enhance the examination
- Omni directional joystick
- Three-position magnification
- Infinitely adjustable slit width and length
- Built-in filters
- 35mm photographic attachment

SL-3E

- Omni directional joystick
- Two fixation targets
- Convenient, lever-controlled magnification change
- Slit beam inclination
- Four built-in filters
- Infinitely adjustable slit width and length
- Pachometer attachment

SL-6E

- Convergent binocular tubes for unprecedented viewing
- Omni directional joystick
- Five-position magnification
- Four built-in filters
- 35mm photographic attachments
- Polaroid attachment model PA-8S
- Video attachment
- Non-contact specular attachment
- Pachometer attachment
- Observation tube

In keeping with our philosophy of supplying only top quality equipment, Keeler are now the exclusive distributors for TOPCON.

The full range of Topcon slit lamps allows the practitioner to choose exactly the right instrument for his particular needs.

Within the range, Topcon now offers high magnification versions of their most popular slit lamps. These are illustrated opposite, and the details listed below.

If a permanent record is required, then this is achievable with photographic attachments which allow the use of 35mm, Polaroid or, in the case of the SL-6E, video recording.
