

### Supplementary Table 1

Control contact lens users: diagnoses for the 213 Controls

Diagnosis	Frequency
<b>Diseases classified as unrelated to contact lens wear: listed by frequency</b>	
Viral conjunctivitis	17
Dry eyes	10
Chalazion	5
Posterior vitreous detachment	4
Sub-tarsal foreign body	4
Conjunctivitis	3
Allergic conjunctivitis	3
Blepharitis & dry eye	3
Marginal keratitis & bilateral blepharitis	3
Conjunctival abrasion (non-lens related)	2
Ocular migraine	2
Recurrent corneal erosion syndrome	2
Chalazion & bilateral blepharitis	3
Corneal foreign body	2
Blepharitis	2
Blepharitis & dry eyes	2
Inflamed chalazion	1
Corneal scar	1
Acute anterior uveitis and right chalazion	1
Acute anterior uveitis	1
Meibomian gland dysfunction & dry eyes	1
Corneal foreign body & conjunctival abrasion	1
Lattice degeneration	1
Sub-tarsal foreign body and corneal abrasion	1
Ametropia	1
Nothing found (given lid hygiene and/or lubricants)	2
Allergic reaction (lids)	1
Blunt trauma	1
Conjunctival retention cyst	1
Eczematous lids	1
Ocular hypertension	1
Nothing found (possibly a systemic viral illness)	1
Allergic reaction (lids) & dry eye	1
In-growing eyelash	1
Episcleritis	1
Blepharitis and right acute hordeoleum	1
Limbritis	1
Dry eyes following viral conjunctivitis	1
Chalazia	1
Vitreous floaters	1
Blepharo-conjunctivitis	1
Marginal keratitis	1
Optic neuritis	1
Marginal keratitis & bilateral dry eyes	1
Retrobulbar optic neuritis	1
Optic disc drusen	1
Preseptal cellulitis and bilateral blepharitis	1
Preseptal cellulitis and chalazion	1

Diseases classified as unrelated to contact lens wear: listed by frequency continued	Frequency
Diagnosis	Frequency
Marginal keratitis and blepharitis	1
Scleritis	1
Chemical keratitis	1
Nothing found	1
<b>Total unrelated to Contact Lens wear</b>	<b>104</b>

Diseases classified as Contact Lens (CL) related: listed by frequency	
Corneal infiltrative event (CIE)	44
CL overwear	23
CL associated - microbial keratitis (MK) - moderate	11
CL associated - microbial keratitis - mild	8
CL associated - uncertain whether a CIE or MK	1
Corneal abrasion (1 in mild keratoconus patient)	8
Toxic (chemical keratitis)	2
CL related punctate corneal erosions (possibly fit related)	1
CL overwear & R conjunctival abrasion	1
CL overwear & dry eyes	1
CL overwear & corneal abrasion	1
Conjunctival abrasion: CL related	1
Scratched CL's & CL related dry eyes	1
CL related punctate epitheliopathy	1
CL related corneal epitheliopathy	1
Epithelial oedema: probably secondary to a tight CL	1
Epitheliopathy: probably CL solution related	1
Retained CL with associated punctate corneal erosions	1
CL associated conjunctival hyperaemia	1
<b>Total CL-Related</b>	<b>109</b>

**Supplementary Table 2**

Contact lens (CL) solution information table (listed alphabetically by manufacturer (where known) and product name)

SOFT CL DISINFECTION SOLUTIONS Unless stated data from ACLM handbooks, internet, solution packaging (Boots and Memmeyerz) and online					
Manufacturers name	Rebranded name	Active disinfectant(s)	Excipients (non-disinfectant ingredients)	Availability at 01/2011	Formulation source
AMO <sup>a</sup> Oxysept 1 step	Not applicable (NA)	Hydrogen peroxide 3%	Neutralized with enzyme neutralizing tablet containing catalase, hydroxypropyl methylcellulose, and cyanocobalamin (vitamin B12) as color indicator, with buffering and tabletting agents. Solution also contains sodium stannate, sodium nitrate, buffered with phosphates and purified water	Yes	Website Y
AMO Complete Revitalens	NA	Polyquaternium-1 0.0003%, Alexidine dihydrochloride 0.00016%	EDTA, Tetronic 904, boric acid/borate [1]	Yes	Kilvington, 2010 Y
Alcon OPTI-FREE EXPRESS	NA	polyquaternium-1 (POLYQUAD®) 0.001% and myristamidopropyl dimethylamine (ALDOX®) 0.0002%	Sodium citrate, sodium chloride, boric acid, sorbitol, aminomethylpropanol, TETRONIC® 1304 <sup>d</sup> , with edetate disodium 0.05%	Yes	Package insert Y
Alcon OPTI-FREE PureMoist	NA	polyquaternium-1 (POLYQUAD®) 0.001% and myristamidopropyl dimethylamine (ALDOX®) 0.0006%	Sodium citrate, sodium chloride, boric acid, sorbitol, aminomethylpropanol, disodium EDTA, two wetting agents (TETRONIC® 1304 <sup>d</sup> and HydraGlyde® Moisture Matrix [EOBO-41® polyoxyethylene/polyoxybutylene])	No from June 2011	Package insert Y
Alcon OPTI-FREE Replenish	NA	polyquaternium-1 (POLYQUAD®) 0.001% and myristamidopropyl dimethylamine (ALDOX®) 0.0005%	Sodium citrate, sodium chloride, sodium borate, propylene glycol, TEARGLYDE® proprietary dual action reconditioning system (TETRONIC® 1304 <sup>d</sup> , nonanoyl ethylenediaminetetraacetic acid)	Yes	Package insert Y
ASDA All in One contact lens solution	Uncertain whether this is own manufacture or rebranded	Polyhexanide (PHMB) (concentration unstated on packaging)	Poloxamer, HPMC, sodium hyaluronate, sodium phosphate	Uncertain	Phone interview with store staff Y
B&L <sup>a</sup> Biotrue	NA	Polyaminopropyl biguanide (PAPB) 0.00013% & polyquaternium 0.0001%. PAPB and PHMB are interchangeable terms <sup>c</sup>	Hyaluronan, sulfobetaine, poloxamine, boric acid, sodium borate, edetate disodium & sodium chloride	Yes	Package insert Y
B&L EasySept	NA	Hydrogen peroxide 3% with catalytic disc	Phosphomic acid, phosphate buffers & sodium chloride	Yes	Package insert Y
B&L Renu MPS for sensitive eyes	NA	Polyaminopropyl biguanide (PAPB, DYMED®) 0.00005%	Boric acid, edetate disodium, poloxamine, sodium borate & sodium chloride	Yes	Package insert Y

B&L ReNu Multiplus	B&L ReNu Fresh	Polyaminopropyl biguanide (PAPB, DYMED®) 0.0001%	Hydroxyalkylphosphonate (HYDRANATE®), boric acid, edetate disodium, poloxamine, sodium borate & sodium chloride	Yes		Package insert	Y
Boots CL solution		Polyaminopropyl biguanide (PAPB) 0.0001% PAPB and PHMB are interchangeable terms <sup>c</sup>	Hydroxyalkylphosphonate 0.03%, poloxamine 1%, boric acid, disodium edetate, sodium borate & sodium chloride	Same formulation as B&L ReNu Multiplus/Fresh		Package insert	Y
Boots All In One		Polyaminopropyl biguanide (PAPB) 0.0005% PAPB and PHMB are interchangeable terms <sup>c</sup>	Poloxamine 1%, boric acid, disodium edetate, sodium borate & sodium chloride	Same formulation as B&L ReNu MPS for sensitive eyes		Package insert	Y
Ciba Vision AOSept Plus	NA	Hydrogen peroxide 3% with catalytic disc	Phosphonic acid, phosphate buffers, poloxamer & sodium chloride	Yes		Package insert	Y
Ciba Vision Sotocare Aqua <sup>e</sup>	Menicon Solocare Aqua	PHMB 0.0001%	Dexapanthanol (provitamin B5), Tromethamine, Sodium dihydrogen phosphate, Poloxamer 407, Ethylenediaminetetraacetic acid (EDTA), Sorbitol	Yes		Product brochure	Y
CooperVision Options Multi	NA	PHMB 0.0001%	Borate buffers	Yes		ACLM Handbook	Y
CooperVision/Sauflon ComfortVue	Procis Premium All in One (Optic Actuell, Germany).	PHMB 0.0001%	Poloxamer, phosphate buffer, hydroxypropyl methylcellulose	Uncertain		ACLM Handbook	Y
CooperVision Sauflon Synerg <sup>i</sup>	easyvision all purpose (Specsavers, UK) AND Irisia Silicone Hydrogel multipurpose solution (France marketed by Generale d' Optique)	Oxipol, Oxychlorite complex (sodium chloride and hydrogen peroxide)	Phosphate, poloxamer, Hydroxypropyl methylcellulose (HPMC), Polyvinylpyrrolidone (PVP) [2]	Yes	Garcia-Porta, 2015	ACLM Handbook	Y
CooperVision Sauflon Multi	easyvision peroxide (Specsavers, UK)	Hydrogen peroxide 3% with platinum catalytic disc		Yes		ACLM Handbook	Y
CooperVision Sauflon All in One Light	easyvision multipurpose (Specsavers, UK)	PHMB 0.0001%	Phosphate, Poloxamer, Disodium edetate [3]	Yes	Beattie, 2003	Y	
	easyvision ultrapurpose	PAPB 0.0013 and Polyquaternium 0.001%					
CooperVision CyClean	NA	PHMB 0.0001%	Hyaluronan, Sulfoacetaine (detergent that may have antimicrobial effects), boric acid, sodium borate, EDTA, sodium chloride	Uncertain		Phone interview with store staff	Y
Menicon MeniCare Soft multipurpose solution	NA	PHMB 0.0001%	Phosphate, Poloxamer, HPMC (Biopol), EDTA, Macrogolglycerol, hydroxystearate 60, EDTA, propylene glycol, tonicity agents (2)	Yes	Kilvington, 2010	Manufacturer	N
MesmerEyez multipurpose soft lens solution	Unknown no response from UK distributor	PHMB (concentration not on bottle or website) No response	EDTA, Poloxamer, Boric acid, Sodium borate, sodium chloride, hydroxypropylmethylcellulose	Yes		Bottle label	Y

		to email to company on 30 1 16				
Morrison's All in One contact lens solution	Not clear whether this is own brand or rebranded Own manufacture	Polyhexanide (PHMB) concentration not stated Polyhexanide (PHMB) 0.0001%	Sodium and potassium chloride, EDTA, poloxamer, HPMC, sodium hyaluronate, sodium phosphate	Uncertain	From website	Y
Optical Express Ciel All in One contact lens solution	Proprietary to Sainsbury's (East Midlands Pharmaceuticals)	PHMB 0.00015%	The active ingredient is the only one listed on the packaging	Uncertain	Phone Interview with store staff	
Sainsbury's all in one contact lens solution	Proprietary to Tesco's (East Midlands Pharmaceuticals)	PHMB 0.0002%	Disodium Edetate, Hyromellose, Poloxamer, Sodium & Potassium Chloride	No from August 2012	Product brochure	Y
Tesco all in one contact lens solution			Disodium Edetate, Sodium Hyaluronate, Hyromellose, Poloxamer, Sodium & Potassium Chloride	Yes	Product brochure	Y
<b>SOFT CL CLEANING SOLUTIONS</b>						
EYEYE crystal cleaning solution now rebranded as Océ Clean 40	Oté Pharma Sol BV Netherlands 5406	PHMB 0.002% as preservative	Non-ionogenic cleaning ingredients	Yes	From bottle	Y
<b>RIGID CL DISINFECTION SOLUTIONS</b>						
AMO Total Care disinfecting, storing and wetting solution	NA	PHMB 0.0001%	Purified water, tromethamine, sodium chloride, hydroxypropylmethylcellulose, EDTA and tyloxapol	Yes	Website	Y
B&L Boston Advance	NA	chlorhexidine gluconate (0.003%), PAMB (0.0005%)	Cationic cellulose derivative polymer, a cellulosic viscosifier, polyvinyl alcohol and a derivatized polyethylene glycol, edetate disodium (0.05%).	Yes	Package insert	Y
B&L Boston Simplus	NA	chlorhexidine gluconate (0.003%), PAMB (0.0005%)	Poloxamine, hydroxymethylphosphonate, boric acid, sodium borate, sodium chloride, hydroxypropylmethyl cellulose, Glucam	Yes	Package insert	Y
<b>RIGID LENS CLEANERS</b>						
B&L Boston Cleaner	NA	PHMB 0.0005% Chlorhexidine 0.003%	Alkyl ether sulfate (9.8% w/v), ethoxylated alkyl phenol, sodium chloride, silica suspension, sodium phosphate dibasic and triquetary cocoa base phospholipids	Yes	Bottle	Y
EYEYE crystal cleaning solution now rebranded as Océ Clean 40	Oté Pharma Sol BV Netherlands 5406	PHMB 0.002% as preservative	Non-ionogenic cleaning ingredients	Yes	Bottle	N

<sup>a</sup>Abbot Medical Optics

<sup>b</sup>Bausch & Lomb

<sup>c</sup>PAPB and PHMB are interchangeable terms: the term quoted is the one given on the packaging.

<sup>d</sup>TETRONIC® is a registered trademark of BASF.

<sup>e</sup>System contains antibacterial contact lens case

1. Odds ratios (OR) are **not adjusted** for confounding effects of other variables
2. PAI category 2 Includes Polyquad-1(0.001%) + ALDOX (0.0005%) AND (as used by 4 controls and 1 case) Polyquad-1 (0.0003%) + Alexidine (0.00016%)
3. A mean hygiene score was derived for each patient (see legend to supplementary Table 5 for details). The mean score for each patient was then used to divide the patient sample into a simple binary classification for multivariable analysis in which the worst quartile (the quartile with the highest score) of the sample was categorized as having "Poor" hygiene and compared with the rest categorized as having "Good-Moderate" hygiene. "Good-Moderate" had mean scores 1·75 - 5·08, and "Poor" mean scores 5·09 - 8·08). Hand washing before handling CLs and showering while wearing CLs were kept as separate variables and analysed as such.
4. p-value of 0.0004 from non-parametric Mann-Whitney test
5. Listed by categories

**Supplementary Table 5**

Contact lens hygiene compliance assessment methodology

Contact lens hygiene compliance was assessed by patient responses to 14 multiple choice questions listed here. Note: the additional hygiene variables of hand washing before handling CLs, and showering while wearing CLs were kept as separate variables and analysed as such. Hygiene scores were calculated using the following rules. The responses to each question (or composite pair of questions) from each patient were assigned a score of 1 for full compliance, 5 for partial non-compliance, and 10 for complete non-compliance. Some of the closely related original variable pairs were combined into a single analysis variable. The objective was to maximise the difference in scores between those who completely deviated from 'good hygiene practice' and those who were totally compliant with 'good hygiene practice' (scores 10 and 1 respectively). The questions were given equal importance (no weighting). For each patient, the scores were summed across all the variables, then divided by the number of observations (number of variables with score data), to arrive at a mean score for each patient. The mean score for each patient was then used to divide the patient sample into a simple binary classification for multivariable analysis (the detailed methodology for this is described in footnote 3 supplementary table 4 and in the footnotes to Tables 1 and 2).

Category	Hygiene question Variables	Score	Variable ID
	<b>Q23: How often do you use disinfecting solution</b>		1
1	Always	1	
2	Uses extended wear disposable CLs, dispose on removal, no disinfectant (excluded from main analysis sample)*	1	
3	Sometimes	10	
4	Never (excluded from main analysis sample)##	10	
	<b>Q28: How long had the bottle of solution been open</b>		2
1	1 to 30 days	1	
2	31 to 59 days	5	
3	60 or more days	10	
	<b>Q29: Did you transfer your solution into another container</b>		3
	<b>Q30: Did you use this transferred solution the last time you rinsed or stored the lenses</b>		4
1	Q29=No	1	
2	Q29=Yes, Q30=No	1	
3	Q29=yes, Q30=Unsure	5	
4	Q29=Yes, Q30=Yes	10	
	<b>Q31: Did you rub your lenses the last time before you STORED them</b>		5
1	No	10	
2	Yes	1	
99	Unsure	Blank	
	<b>Q32: Did you rinse your lenses before you STORED them</b>		6(a)
	<b>Q32n If Yes, rinsed with what?</b>		6(b)
1	Q32=No	10	
2	Q32=Yes, Q32n=with Water	5	
3	Q32=Yes, Q32n=with disinfectant solution / Saline	1	
	<b>Q33: Did you rinse your lenses the last time before you inserted them into your eyes</b>		7(a)
	<b>Q33n: If Yes, with what?</b>		7(b)
1	Q33=No	10	

2	Q33=Yes, Q33n= disinfectant solution / Saline	1	
3	Q33=Yes, Q33n= Hot water	5	
4	Q33=Yes, Q33n= Warm water / Water	10	
	<b>Q34: Did you rub your lenses the last time before you inserted them into your eyes</b>		8
1	No	10	
2	Yes (all responses: "with disinfectant solution")	1	
	<b>Q35: Did you replace all the disinfecting solution in your case</b>		9
1	No, topped it up	10	
2	Yes	1	
99	Unsure	Blank	
	<b>Q36: After you took your contact lenses out, did you rinse your case</b>		10
	<b>Q37: What did you rinse your case with</b>		11
1	No rinse	10	
2	Yes, with Saline	1	
3	Yes, with Water	5	
4	Yes, with disinfectant solution	1	
99	Unsure	Blank	
	<b>Q38: Did you empty your case and leave it to dry</b>		12
1	No	10	
2	Yes	1	
99	Unsure	Blank	
	<b>Q39: How old was your case when the symptoms started</b>		13
1	One to 90 days old	1	
2	More than 90 days	10	
	<b>Q57: Where did you LAST carry out contact lens insertion and removal</b>		14
1	Bathroom	1	
2	Kitchen	5	
3	Bedroom	5	
4	Other	10	
99	Unsure	Blank	

\* The categories of lens are not reusable daily wear CL's and irrelevant to the analysis

# This category was for 7 controls using saline only

**Supplementary Table 6**

## Covariate adjustment

Confounders (covariates) adjusted for in the final regression models constructed to estimate the odds ratios for a particular risk factor with optimal adjustment for confounding.

<b>Risk factor of 'main interest'</b>	<b>Covariates adjusted for:</b>	<b>Final Model #</b>
<b>Lens Disinfectant (PAI)</b>	Hygiene Score; Hand washing; Shower wearing CLs; Water Activities wearing CLs; Ethnic Group; Occupation	1
<b>CL Materials</b>	As for Model-1, but excluding Rigid CL solutions	2
<b>Hygiene Score</b>	As for Model-1, but excluding "Shower wearing CLs"	3
<b>Hand washing</b>	As for Model-3	3
<b>Shower wearing CLs</b>	As for Model-1	1
<b>Water Activities wearing CLs</b>	As for Model-3	3
<b>Ethnic Group</b>	As for Model-3	3
<b>Occupation</b>	As for Model-3	3

**Supplementary Table 7**

Swimming whilst wearing contact lenses.

Comparison of current dataset (collected 12-12-2013 to 05-06-2017 with dataset from a similar case control study of microbial keratitis (all causes) in contact lens users for data collected at Moorfields 03-12-2003 to 02-12-2005 (Reference 14 in the Text: Dart JK, Radford CF, Minassian D, Verma S, Stapleton F. Risk factors for microbial keratitis with contemporary contact lenses: a case-control study. *Ophthalmology* 2008; **115**(10): 1647-54).

<b>Dataset and category</b>	<b>Total number</b>	<b>Users swimming in contact lenses</b>	
		<b>Number</b>	<b>Percent</b>
<b>Current study 12-12-2013 to 05-06-2017</b>			
<i>Acanthamoeba</i> keratitis cases	60	40	66.67
Control dataset 22-11-2016 to 05-06-2017	213	99	46.48
Cases and controls combined	273	139	50.92
<hr/>			
<b>Dataset from 03-12-2003 to 02-12-2005 study</b>			
Microbial keratitis cases	366	224	61.20
Population controls	637	326	51.18
Hospital controls	1921	1103	57.42
All cases and controls combined	2924	1653	56.53
