### A. Background of the respondents

1. Approximate number of patients with uveitis in your clinic.
2. Approximate number of OS patients in your clinic.
3. What criteria do you use for the diagnosis of ocular sarcoidosis? Please choose one.
   - Enter name of your criteria here if you chose "others".
4. What tool(s) do you use to evaluate inflammatory activity of OS when you start therapy? (Multiple choices allowed)
   - Enter here if you chose "others".
5. What tool(s) do you use to monitor the effectiveness of therapy? (Multiple choices allowed)
   - Enter here if you chose "others".

### B. Anterior uveitis (AU) in OS

1. What ocular manifestations of AU do you treat? (Multiple choices allowed)
2. What is the first line therapy for severe AU (e.g. iris nodules, many mutton fat KPs, AC cells = 3+ or more)?
3. What is the second line therapy for severe AU (e.g. iris nodules, many mutton fat KPs, AC cells = 3+ or more)?
4. What is the first line therapy for moderate AU (e.g. AC cells < 3+)?
5. What is the second line therapy for moderate AU (e.g. AC cells < 3+)?
6. Do you keep treating inactive AU (no AC cells, no AC flare)?
7. Do you use mydriatics for active AU?

### C. Intermediate uveitis (IU) in OS

1. What ocular manifestations of IU do you treat? (Multiple choices allowed)
2. What is the first line therapy for bilateral active IU?
3. What is the second line therapy for bilateral active IU?
4. What is the first line therapy for unilateral active IU?
5. What is the second line therapy for unilateral active IU?

### D. Posterior uveitis (PU) in OS

1. What ocular manifestations of PU do you treat? (Multiple choices allowed)
2. What is the first line therapy for bilateral active PU?
3. What is the second line therapy for bilateral active PU?
4. What is the first line therapy for unilateral active PU?
5. What is the second line therapy for unilateral active PU?

### E. Corticosteroids, immunosuppressive drugs, biologic drugs

What is the mean initial dose of oral prednisone/prednisolone for severe chronic intermediate/posterior uveitis (OS) causing decreased visual acuity?

What is the mean duration of this initial dose of oral prednisone/prednisolone?

What is the mean duration of total treatment with oral prednisone/prednisolone?

What immunosuppressive drug do you initially use as a steroid-sparing agent if necessary?

Do you use a biologic drug for OS?

If yes, which biologic drug do you use? (Multiple choices allowed)

Enter drug name here if you chose "others".
