

Supplemental Table 2:

List of NDED referred to treatment centre by DRS

| Non diabetic eye disease referred from Screening (NDED) | Context/Explanation | Conditions for referral |
|---|--|--|
| Branch retinal vein occlusion | Clinical finding of BRVO | Local treatment centre referral pathway |
| Central retinal vein occlusion | Clinical finding of CRVO | Local treatment centre referral pathway |
| Branch retinal artery occlusion | Clinical finding of BRAO | Local treatment centre referral pathway |
| Central retinal artery occlusion | Clinical finding of CRAO | Local treatment centre referral pathway |
| Arterial emboli | Retinal arterial emboli Of the eye | Local treatment centre referral pathway |
| Retinitis | Inflammatory disorder Of the eye | Local treatment centre referral pathway |
| Cataract | An opacity of the Crystalline lens of the Eye. May only be observed during slit lamp | Local treatment centre referral pathway |
| Glaucoma | Progressive optic Neuropathy with Characteristic pattern Of optic disc and visual Field damage | Refer if cup to disc ratio >0.8 Or if asymmetry >0.3 |
| Age-related macular degeneration | Clinical finding of AMD | Refer if sub-retinal/intraretinal Haemorrhage and/or exudate |
| Amblyopia | Reduced vision in one Or both eyes caused by Visual deprivation in Childhood | First diagnosis of this condition Requires referral with DR changes |
| Pigmented retinal lesion | Clinical finding of pigment Retinal lesion | Refer lesions >3 disc area or pigmented lesion with lipofuscin |
