

OCT finding	Proportion of eyes	Major location
Intraretinal cysts	44% any cysts 10% GCL+INL+ONL cysts 22% INL+ONL (no GCL) cysts	outer and the inner ring of ETDRS grid, half of eyes also within central 1mm ETDRS subfield
Subretinal fluid	38%	outer and inner ring of ETDRS grid, two thirds also within central 1mm ETDRS subfield
Sub-pigment epithelial (PE) fluid	64%	in 59% of affected eyes within central 1mm ETDRS subfield
Subretinal fibrosis	96%	No location evaluated
Hyperreflective foci	100%	in 90% of affected eyes within central 1mm ETDRS subfield
Disruption of external limiting membrane (ELM)	76%	in 68% of affected eyes within central 1mm ETDRS subfield
Disruption of Inner-Outer-Segment junction line (IS-OS line)	98%	in 65% of affected eyes within central 1mm ETDRS subfield

Supplemental Table: AMD specific OCT findings and their major locations
