**A NEW OVERHEAD
OPHTHALMIC BRACKET.**

Design No. 62.

THIS bracket enables one to place the patient close to the wall where space is a consideration. It also has the advantages of rapid movement from one side of the head to the other, and is readily extended to accommodate the height of patient.

It has a graduated resistance and either a frosted or silvered lamp.

A retinoscopy shield with ball and socket hinge can be supplied, which contains frosted, daylight and amber filters at a small extra charge.

*Price of bracket with
resistance*

£7 : 7 : 0

The Keeler Ophthalmic Equipment.

For years the Oculist has been demanding an inexpensive apparatus combining, in neat and handy form, the equipment requisite for his routine work.

It has been claimed with every confidence that the Keeler Ophthalmic Equipment, which is the result of much careful experiment, exactly fulfils the Oculist's need-

Detailed descriptions of any of these Instruments are available upon request.

SOLE MANUFACTURERS AND PATENTEES,

C. DAVIS KEELER,

Oculists' Dispenser and Ophthalmic Instrument Manufacturer,

47, WIGMORE STREET, LONDON, W.1

BRANCHES -PLYMOUTH, TRURO and PENZANCE.

THE ARMSTRONG RECORDING SCOTOMETER.

AN ingenious mechanical apparatus designed to improve the value of the Bjerrum Screen by providing a means of charting, with accuracy and rapidity, scotomata occurring in the central portion of the visual field. The area that can be investigated extends from the fixation point outwards to the 30° circle.

Illustrative Booklet sent on application.
