HAMBLIN'S NEW DIAGNOSTIC SET

The above illustration depicts a new diagnostic set that has been designed, with the co-operation of several Surgeons, to meet the demand for a comprehensive and efficient set of instruments for general purposes at a low cost. The set includes an electric Ophthalmoscope with a stainless steel mirror of Marple pattern and a large handle with an octagonal head, an Auriscope with three Specula to fit the same handle, a Thudichum Nasal Speculum, a Tongue Depressor, a Laryngoscope with laryngeal and post-nasal mirrors, a double folding Retinoscope with concave and plane mirrors, a $\times 13$ dioptré Condensing Lens, and a spare lamp. The whole is fitted into a compact leather-covered velvet-lined case. Each instrument may be supplied separately if desired.

Price, complete in case

£7 : 15 : 0

Ophthalmoscope only, in case	£3 10 0
Auriscope only, without handle	1 15 0
Auriscope only, complete with handle, in case	3 0 0

The Keeler Ophthalmic Equipment.

For years the Oculist has been demanding an inexpensive apparatus combining, in neat and handy form, the equipment requisite for his routine work.

It has been claimed with every confidence that the Keeler Ophthalmic Equipment, which is the result of much careful experiment, exactly fulfils the Oculist's need.

Detailed descriptions of any of these Instruments are available upon request.

BRANCHES—PLYMOUTH, TRURO and PENZANCE.

THE ARMSTRONG RECORDING SCOTOMETER.

AN ingenious mechanical apparatus designed to improve the value of the Bjerrum Screen by providing a means of charting, with accuracy and rapidity, scotomata occurring in the central portion of the visual field. The area that can be investigated extends from the fixation point outwards to the 30° circle.

Illustrative Booklet sent on application.
