OBITUARY

FRANK CRAWLEY, F.R.C.S.I.

We regret to record the sudden death in Dublin on December 15, 1935, of Mr. Crawley. Born in Dublin in 1871, he was the son of the late W. J. Chetwode Crawley, LL.D., D.C.L. After preliminary education in Ireland he entered Shrewsbury School in 1886, where he was in School House under Moss. He left in the next year for Caius College, Cambridge, and took his B.A. in 1892. Crawley qualified M.B., B.Ch. at Dublin in 1896, and later took the M.D., becoming F.R.C.S.I. in 1900. After postgraduate study in Berlin and Vienna he returned to Dublin and was elected surgeon to the Royal Victoria Eye and Ear Hospital. Later he became ophthalmic surgeon to the City of Dublin Hospital, and consulting ophthalmic surgeon at the Rotunda.

Crawley served as President of the Royal College of Surgeons in Ireland from 1932-1934, and he was president of the section of ophthalmology of the British Medical Association at the Dublin meeting three years ago. He became a member of the Ophthalmological Society of the United Kingdom in 1901, and contributed a large number of papers to its Transactions. These were nearly all of purely clinical character and cover a wide field, as befitted a first-class ophthalmic surgeon, whose reputation, both in his own island and in Great Britain, was deservedly high.

His death is a severe blow to British ophthalmology.

PROFESSOR RICHARD DEUTSCHMANN

We regret to record the death of this veteran German ophthalmologist on November 13, 1935, at the great age of 83 years. The following appreciation is epitomised from an account kindly furnished by Professor W. Gilbert, of Hamburg, to whom we are greatly indebted.

Notwithstanding severe bodily suffering, Dr. Deutschmann was at work until a few days before his death. He was born in 1852 in Silesia and began the study of ophthalmology at Göttingen as a pupil of Leber. After further study in London and Paris he settled in Hamburg and quickly made a great reputation both on the Continent and in this country as a sound ophthalmologist. Much of his early published work was on the subject of sympathetic ophthalmitis, and he was honoured by the German Ophthalmological Society in 1889 when he received the Graefe prize for his essay.

It is interesting to recall that Deutschmann was among the first to refuse to believe that retinal detachment was an incurable disease. At a time when almost every other ophthalmic surgeon considered retinal detachment a hopeless condition, Deutschmann
pursued his work, devising operations for transfixing the retina as well as more chemical methods, such as cauterising the sclerotic with tincture of iodine, and later by carbon dioxide snow. Dr. Gilbert speaks enthusiastically of the results obtained by Deutschmann. He says:

"His view differed from that held by many to-day in that he regarded holes in the retina as usually secondary, and hence he thought that rupture of the retina was a reparative process."

A few weeks before he died he returned to the question of retinal detachment in a paper in Zeitsch. f. Augenheilk., Vol. LXXXVII, insisting that only after many years of observation and experience would it be possible to determine which of the various methods of treatment employed to-day will give the best results.

Among other therapeutic measures which interested him was non-specific protein therapy. For many years he edited the Beit. zur Augenheilk., a journal which he originated.

NOTES

In the New Year’s Honours List we are pleased to see the name of Lieut.-Colonel A. M. Dick, O.B.E., F.R.C.S., I.M.S., Professor of Ophthalmology at King Edward’s Medical College, Lahore, who receives the C.B.E.

FUTURE ARRANGEMENTS

1936

February 4.—Midland Ophthalmological Society, at Stoke (Royal Infirmary).
February 7.—North of England Ophthalmological Society, at Newcastle-on-Tyne.
February 14.—Royal Society of Medicine, Section of Ophthalmology.
March 6.—North of England Ophthalmological Society, at Liverpool.
March 12.—Royal London Ophthalmic Hospital, Annual Dinner.
March 13.—Royal Society of Medicine, Section of Ophthalmology (Clinical Meeting).
March 27.—North of England Ophthalmological Society, at Sheffield.
