ANTERIOR CHAMBER IMPLANTS

We are manufacturing acrylic implants for the anterior chamber.

Our process makes it possible for wide variations in design to be provided.

We have had the advantage of discussion with eminent authorities on this subject, and patterns already manufactured are based upon their recommendations.

We shall be very pleased to send you full details, including those of a complete sterilisation service.

Beats the lot

'CORTISPORIN'

*kills bacteria,
reduces
inflammation.*

This ointment contains bacitracin, neomycin, polymyxin B, and hydrocortisone. It has a wider range of activity than any single antibiotic, destroying gram-positive and gram-negative organisms, including *Ps. pyocyanea*, *proteus* and staphylococci. Bacterial resistance or sensitisation of patients are unlikely with 'Cortisporin'. Furthermore, by virtue of its hydrocortisone, 'Cortisporin' reduces inflammation.

'Cortisporin' BRAND OINTMENT

Issued in collapsible tubes
of 10 gm. with nozzle.

For a quick, easy and accurate VISUAL FIELD testing

■ BOWL made of transparent plastic. White screen painted on the inside ; meridians and parallels engraved on the outside. Illumination uniform and adjustable.

▲ Ever-clear TEST OBJECT projected from the outside, the position of which is easy to mark.

● During the testing, the limits of the visual field are designed straight on the bowl. After examination, they are recorded on special tracing paper CHARTS. Scotomas can be recorded apart, directly traced on the bowl, with the accuracy of a CAMPIMETER.

THE "MODIFIED" PANTOSCOPE

The recently introduced "Modified" Pantoscope is for the specialist who appreciates simplicity combined with brilliant illumination - 12v. 12w, which is more than adequate for any fundus examination even in daylight.

It gives the same superb vision as the famous Pantoscope but for direct and indirect ophthalmoscopy only.

Detailed features include:

- ★ Macular beam, Iris Diaphragm.
- ★ Ordinary or Polarised light.
- ★ +40D. to -25D. viewing lenses.
- ★ -20D. swing-over lens for corneal and anterior chamber examination.
- ★ +10D. swing-over lens for examination of lens and vitreous.
- ★ Compact filament lamp with plano cap for homogenous light on fundus.

Cloudy media, small pupils.

For better vision under such conditions, the MODIFIED Pantoscope with narrow macular beam, polarised light and full 12-watt power, gives excellent results.

The Modified Pantoscope illustrated is fitted with the SELECT-a-LITE switchbase which provides finger-tip brightness control as part of the ophthalmoscope. Illumination can be varied while observing the fundus. The "3-way & off" switch gives 6 volts for ordinary direct ophthalmoscopy, 9 volts for use in polarised light and 12 volts for indirect ophthalmoscopy.

*Members of the Guild of
British Dispensing Opticians*

Makers of spectacles of a fine precision and of a standard worthy of the best work of British craftsmen—a very important but fast dwindling section of the optical industry.

Frames are made and mounted to the individual measurements of each patient and both frame and lenses periodically checked during the course of production.

The finished spectacles are finally checked by a qualified dispensing optician and whenever possible, personally fitted on every patient.

THE MAJOR SYNOPTOPHORE

UNIVERSAL AND STANDARD MODELS

The new Major Synoptophore, which supersedes the popular Moorfields Synoptophore and the Lyle Major Amblyoscope, was designed with the co-operation of several leading Surgeons and Orthoptists. Two models of this fine instrument are available — the Universal Model as illustrated, and the Standard Model which has all the features listed at right, with the exception of the last.

Both Models can be supplied immediately.

- *P.D. scale on Orthoptist's side
- *Higher chin rest movement
- *Large breathshield
- *Sloping handles for tiny children
- *Direct reading Ductions Scale
- *Unbreakable perspex opals
- *Easy, Positive Ductions Locks
- *Cyclophoria Scale engraved IN and EX
- *Transformer inside base
- *Lifting handles on the base
- *Provision for After Image Test and/or Automatic Flashing (on Universal Model only, as illustrated)

ALL-ELECTRIC TEST TYPE

The All-Electric Test Type is of a completely new design and by using internal illumination it is considerably lighter in weight than earlier models. A standard area type is used. The motor is silent. The control unit may be fixed at any distance from the type on wall or desk. The opal plastic types are easily interchangeable.

The standard model is cream with a black base. All-black models can be supplied on request.

HAMBLIN

OPTICIANS BY APPOINTMENT

THE
HAMBLIN
(LISTER-MORTON)
OPHTHALMOSCOPE

Introduced in 1928 the Hamblin Lister-Morton Ophthalmoscope remains the Standard amongst electrical ophthalmoscopes with a performance that has yet to be surpassed. The lighting system has been designed to cut down corneal reflex to a minimum and to eliminate reflections, thus making it possible to carry out a direct examination of the macular region in a fully lighted room without using mydriatics.

The battery model, as illustrated, being self-contained is ideal for bedside examination, but operation from the mains is usually preferred in the consulting room. A good arrangement for a busy Surgeon is to use the battery model for visiting purposes and to have an interchangeable mains handle complete with lamp and condensing system for consulting room use.

IMPORTANT NOTICE

OPHTHALMOSCOPE BATTERIES

Manufacturers of the dry cells used in Hamblin Ophthalmoscopes have recently altered their design. The new style may short-circuit against the stop-ring in the upper end of the earlier type Lister-Morton handles.

To remedy this, the diameter of the hole in the stop-ring on all Hamblin Ophthalmoscopes now being manufactured has been slightly increased.

When existing ophthalmoscopes are received for routine overhaul, the stop-ring will accordingly be altered without extra charge.

PARTY LADY

Our model is not wearing spectacles. If it were necessary she would undoubtedly be attracted by a Spiller frame made to suit her features, her dress style and her purse. Such a frame might be the Spiller "Naturelle" Supra. This up-to-the-minute frame is made in two-colour, very light Perspex and has young and pleasing lines. A special medical point is the very wide field of vision that the frame offers.
