## "TRI-SIDE" TEST TYPE

This "Tri-side" internally illuminated test-type cabinet has the great advantage of being lighter and much cheaper than conventional four-sided units. The three plastic unbreakable panels are full size and provide all that is necessary for routine subjective examinations. This conveniently designed unit takes up less room and is ideal for wall-fitting in awkward corners.

Ref. 1446E. TRI-SIDE TYPE with 2 letter panels and one illiterate "E" panel, plus lower spotlight panel.

Optional alternative: Kindergarten panel.

Optional Extras: The following may be fitted adjacent to the spotlight panel:

Ref. 1447B. DUOCHROME TEST.

Ref. 1448B. "FRIEND" TEST.

Ref. 1449B. WORTH 4-DOT TEST.

## ACCESSORIES FOR CORNEAL GRAFTING

### Pittar Splint

Made of thin tantalum metal, it has a central perforation for drainage and four peripheral lugs for the attachment of retaining sutures.

### Pittar Trephine Guide

The guide facilitates the centration of the trephine prior to securing a graft with a Pittar or a Stallard Splint.

### Stallard Splint

Similar to the Pittar pattern, but without perforation and made in transparent acrylic so that the entire graft may be kept under observation.

### Philps Splint

Made in acrylic, it has peripheral holes for the reception of sutures and additional perforations for drainage. An engraved cross enables the splint to be centred with ease.

### Ainslie Splint

Ainslie's Modification of the Philps Splint differs from the original only in having considerably larger drainage holes.

### Ainslie Corneal Marker

The Corneal Marker is for marking precisely on the cornea the locations for the retaining sutures. Its eight short needle points exactly correspond with the suture holes of the splint.

*Hamblin*

**TEAR CLEAR**

## **PREDSOL EYE/EAR DROPS**

**contain no insoluble hormone particles**

Predsol Eye/Ear Drops are a crystal-clear, stable, aqueous solution of 0.5% prednisolone phosphate, a compound two thousand times more soluble than hydrocortisone, or prednisolone itself. Because it is so soluble, Predsol by topical application achieves the most rapid and most thorough contact with affected tissues so producing maximum therapeutic effect.

## NEW FOR GLAUCOMA

reduce intra-ocular pressure  
with a new, highly potent  
carbonic anhydrase inhibitor

### 'DARANIDE'

- inhibits the formation of aqueous humour
- lowers intra-ocular tension within one hour and maintains this reduction for six hours or more
- gives smooth control with relatively few side-effects
- reduces the likelihood of metabolic acidosis in comparison with other carbonic anhydrase inhibitors
- may often be effective when other carbonic anhydrase inhibitors have failed or have not been tolerated

*for the oral treatment of glaucoma*

# DARANIDE

(Dichlorphenamide)

How Supplied: Tablets, 50 mg., in bottles of 100.

The United Kingdom N.H.S. basic cost is 40s. 0d. per 100 tablets (plus purchase tax).

## Zonulysin in cataract

Zonulysin is a highly purified, sterile freeze-dried Alpha-Chymotrypsin, which is particularly indicated for resolving the ciliary zonule.

Maw's Zonulysin is presented in a convenient form for this purpose, allowing easy preparation of a fresh solution for each procedure.

Zonulysin instilled to flood anterior and bathe suspensory ligament.

Suspensory ligament resolved giving easy withdrawal of crystalline lens.

Supplied in boxes of 6 ampoules, each containing 0.2 mgm. Alpha-Chymotrypsin together with 6 ampoules each containing 1.0 ml. of Saline diluent.

conditions  
with

#### Control of Inflammation

The hydrocortisone in Terra-Cortril Eye/Ear Suspension quickly reduces inflammation, relieving symptoms and reducing the risk of permanent damage from scarring.

# Terra-Cortril\*

brand of oxytetracycline and hydrocortisone  
**EYE/EAR SUSPENSION**

Terra-Cortril Eye/Ear Suspension is of outstanding value in two groups of eye conditions (1) where an inflammatory process is complicated by infection or the risk of infection (2) where treatment of the condition is hindered by the presence of excessive inflammation.

#### Control of Infection

Terra-Cortril Eye/Ear Suspension also contains Terramycin\*. This potent and unusually well tolerated antibiotic rapidly controls infection, and will prevent the emergence of infection during the treatment of a simple inflammatory reaction.

Terra-Cortril Eye/Ear Suspension is presented in a 5 ml. tube containing, in a controlled-viscosity, gel-like base, 1.5% hydrocortisone acetate, 0.5% Terramycin and 0.1% polymyxin B sulphate. The tube is equipped with a special, slender applicator nozzle for ease of administration.

**TEACHING**

A **Reflecting Plate 1025E** (inset above) enables two observers to view a fundus at the same time. The Plate transmits about 50% of the light incident on it from the patient's fundus and reflects 50% towards the second observer.

This accessory is excellent for teaching fundus appearances to students. Being portable, the Fison Ophthalmoscope with Reflecting Plate entirely supersedes other demonstrating ophthalmoscopes since it may be carried round wards and clinics.

**39, Wigmore Street,

**5241, Whitby Avenue,  
Philadelphia 43, Pa., U.S.A.**

What  
will it do  
for my  
ophthalmic  
patient?

Q How does 'CODELSOL' Eye-Ear Solution act?

A It relieves pain and irritation within minutes and the effects last several hours. Secondary infection is prevented by neomycin.

Q Why is 'CODELSOL' Eye-Ear Solution non-irritating to the eye?

A Because it is not a suspension but a fully-soluble solution and therefore contains no harmful particles.

Q What ear conditions may be treated?

A Acute and chronic otitis externa, neuro-dermatitis and seborrhoeic dermatitis.

Q Why is 'CODELSOL' Eye-Ear Solution quite different from other steroid ophthalmic preparations?

A Because it contains prednisolone 21-phosphate which is 2,000 times more soluble than hydrocortisone, and hence achieves maximum penetration of the tissues.

**How supplied:** EYE-EAR Solution 'CODELSOL' with Neomycin is supplied in 2.5 ml. dropper bottles. Each ml. contains 5 mg. prednisolone 21-phosphate and 5 mg. neomycin sulphate. The United Kingdom N.H.S. basic cost is 10s. 0d. per 2.5 ml.

## Hamblin Purvis Streak Retinoscope

The Streak Retinoscope made by Hamblin possesses a "streak" or bar form of light, of special value because it produces a reflex less confusing than that from a round spot of light, and because it enables the axis of astigmatism to be located with accuracy.

It is possible with this retinoscope to carry out refractions with greater facility and speed than with a mirror.

### LADY SHOPPING

Our model is not wearing spectacles. If it were necessary she would undoubtedly be attracted by a Spiller model made to suit her features, her dress style and her purse. Such a frame might be the Spiller "Venus" in which an ultra-modern trend is combined with the old-fashioned virtues of beauty of form and craftsmanship. This is a two-tone nitrate frame and several colour combinations are available.
