Patent No.: 824876

THE TEMPLE GRIP TRIAL FRAME

Designed to fit all faces.

Allows for asymmetrical eyes.

Only one screw adjustment to each eye.

THE TEMPLE GRIP FRAME

A Spectacle that does not rest on the nose, yet retains the appearance of a normal frame.

Especially useful in cases of patients who cannot tolerate any pressure on the bridge of the nose.

**SPECTACLES
INDIVIDUALLY
DESIGNED**

Clement Clarke specialise in the design and manufacture of spectacles to individual requirements, and offer an almost limitless range of styles in real tortoiseshell and coloured synthetic materials.

THE HIGHEST STANDARDS OF OPTICAL DISPENSING

Our service to the Ophthalmic Medical Profession dates from the year 1840, for it was in that year that our firm was established in the City of London.

Tradition and service have, and always will play an important part of the life that is contained in the 'Square Mile', and although we have now extended our organisation to Branches in other parts of London and the Home Counties, we have been at pains to maintain at these other establishments the reputation that the City of London enjoys.

We look forward to dispensing the requirements of your patients, backed with the advantages of past experience coupled with attention to present advances.

OUT with
battery
troubles

These latest KEELER electrical items are the final solution to the problem of ensuring constant bright light in battery instruments, making conventional dry cells a thing of the past.

THE CHARGING UNITS

Single Unit (shown above)

- ★ Double wound transformer for safety.
- ★ Recharges Charge-a-Lite inserts or complete handles.
- ★ 2 models, 110v A.C. (1636E), 230/250v A.C. (1637E).

Double Unit (shown opposite)

- ★ Simultaneous charging of 2 Charge-a-Lite inserts or 2 complete handles.
- ★ 2 models—110v A.C. (1638E), 230/250v A.C. (1639E).

IN with **KEELER**
RECHARGEABLE
UNITS

THE CHARGE-A-LITE — a rechargeable battery insert (ref. 1631G).

- ★ Fits any Keeler battery handle and most other handles of U.2 battery size.
- ★ More than 3 hours capacity at maximum brilliance.
- ★ Controlled voltage ensuring greater bulb life.

The Keeler Charge-a-Lite and the Single Charging Unit are the only items required to convert any Ophthalmoscope and/or Retinoscope to modern rechargeable specifications.

RECHARGEABLE HANDLES.

Made to the same high specifications as the Charge-a-Lite inserts the rechargeable handles (below and right) are complete entities and may be inserted directly into either charging unit. The handles are slim, well-balanced and have a durable satin-chrome finish.

Both handles and charging units are attractively styled for desk use, so that automatic recharging can take place between examinations.

1633 G 1632 G

MODEL 1632 G: designed for all instrument heads except the Specialist Ophthalmoscope and Streak Retinoscope.

MODEL 1633 G: especially designed for the "Specialist" and "Streak" but will accept all heads.

NOT JUST A NOVELTY . . .

a major contribution to trouble-free electrical power. An investment now ensures against battery failures in the future.

Hamblin Cabinet Test Type

.....

No. 804

IMPROVED DESIGN

Reflections from the glass front are eliminated in the redesigned Hamblin Cabinet Test Type. The lighting is now housed internally; it provides the types with good, even illumination. As many as eight types, selected by the oculist, are mounted on rollers for remote control by cord. Maddox 'Spot' and Duochrome Test are incorporated.

TEAR CLEAR

PREDSOL EYE/EAR DROPS

contain no insoluble hormone particles

Predsol Eye/Ear Drops are a crystal-clear, stable, aqueous solution of 0.5% prednisolone phosphate, a compound two thousand times more soluble than hydrocortisone, or prednisolone itself. Because it is so soluble, Predsol by topical application achieves the most rapid and most thorough contact with affected tissues so producing maximum therapeutic effect.

PREDSOL

TRADE MARK

the water-soluble prednisolone

If infection is present or suspected, use:—

PREDSOL-N EYE/EAR DROPS

0.5% prednisolone phosphate with 0.5% neomycin sulphate

Both products are issued in 3 ml. drop bottles

Zonulysin in cataract

Zonulysin is a highly purified, sterile freeze-dried Alpha-Chymotrypsin, which is particularly indicated for resolving the ciliary zonule.

Maw's Zonulysin is presented in a convenient form for this purpose, allowing easy preparation of a fresh solution for each procedure.

Zonulysin instilled to flood anterior and bathe suspensory ligament.

Suspensory ligament resolved giving easy withdrawal of crystalline lens.

Supplied in boxes of 6 ampoules, each containing 0.2 mgm. Alpha-Chymotrypsin together with 6 ampoules each containing 1.0 ml. of Saline diluent.

M. ODELL, *Secretary.*

*Members of the Guild of
British Dispensing Opticians*

Makers of spectacles of a fine precision and of a standard worthy of the best work of British craftsmen—a very important but fast dwindling section of the optical industry.

Frames are made and mounted to the individual measurements of each patient and both frame and lenses periodically checked during the course of production.

The finished spectacles are finally checked by a qualified dispensing optician and whenever possible, personally fitted on every patient.
