

Course in Neuro-Ophthalmology

Miami Beach, 4 to 7 January 1977

The annual course in neuro-ophthalmology will be held at the Doral Beach Hotel, Miami Beach, Florida. The following topics will be emphasized: cerebrovascular disease; computerized axial tomography in neuro-ophthalmology; anatomy and diseases of the parasellar area. Clinical case material will be presented for general discussion, and question-and-answer ses-

sions will invite audience participation. Registrants may submit short free-papers by 15 November 1976 on clinical subjects.

Further information may be obtained from the Bascom Palmer Eye Institute, Department of Ophthalmology, University of Miami School of Medicine, PO Box 520875, Miami, Florida 33152, USA.

Midwinter Seminar in Ophthalmology

Miami Beach, 31 January to 2 February 1977

The 32nd annual seminar in ophthalmology will be held at the Americana Hotel, Miami Beach, Florida. The main topic will be glaucoma.

It is to be co-sponsored by the University of Florida

College of Medicine (Gainesville), the University of Miami School of Medicine (Miami), and the University of South Florida College of Medicine (Tampa).

Obituary

Norman Patrick Robert Galloway, MB, ChB

N. P. R. Galloway died after a short illness on 2 February 1976. Although he retired from the Nottingham Eye Hospital in 1961, he had continued working as an ophthalmologist until just before his death. He was still a council member of the Ophthalmological Section of the Royal Society of Medicine and his cheerful and kindly presence was well known to members of the Midland and the North of England Ophthalmological Societies. He was President of the Midland Ophthalmological Society in 1951-52. For many years he was on the council of the Oxford Congress and served as Deputy Master of the Congress in 1960. He also took

an active part in local medical affairs, having been secretary to the Nottingham Medico Chirurgical Society during the second world war and President in 1950. His career began in Edinburgh where he qualified in 1917 and he saw active service in the first world war as a Captain in the RAMC. Soon after the war he developed an enduring interest in his specialty and for nearly 47 years he practised in Nottingham. During this time he became greatly loved and respected and there are many who will miss his kindly attentions both as patients and colleagues.
