Editorial: Onchocerciasis—out of the oubliette *page* 427

Effects of various concentrations of diethylcarbamazine citrate applied as eye drops in ocular onchocerciasis, and the possibilities of improved therapy from continuous non-pulsed delivery BARRIE R. JONES, JOHN ANDERSON, AND HARALD FUGLSANG *page* 428

Evaluation of microfilaricidal effects in the cornea from topically applied drugs in ocular onchocerciasis: trials with levamisole and mebendazole BARRIE R. JONES, JOHN ANDERSON, AND HARALD FUGLSANG *page* 440

Further observations on the relationship between ocular onchocerciasis and the head nodule, and on the possible benefit of nodulectomy H. FUGLSANG AND JOHN ANDERSON *page* 445

Further studies on the treatment of ocular onchocerciasis with diethylcarbamazine and suramin J. ANDERSON AND H. FUGLSANG *page* 450

Aspects of corneal changes in onchocerciasis ASBJØRN M. TØNJUM AND BJØRN THYLEFORS *page* 458

Visual field defects in onchocerciasis BJØRN THYLEFORS AND ASBJØRN M. TØNJUM *page* 462

Two special indications for intraocular lens implantation B. BIEDNER, L. ROTHKOFF, T. MONOS, AND M. BLUMENTHAL *page* 468

Early postoperative sterile hypopyons J. W. HUNTER *page* 470

Depth of anterior chamber after cataract extraction M. S. NORN *page* 474

Dural arteriovenous malformations involving the cavernous sinus: a case report JOHN A. COSTIN, MEREDITH A. WEINSTEIN, A. J. BERLIN, RUSSEL W. HARDY, AND F. A. GUTMAN *page* 478

Dural arteriovenous fistula and spontaneous choroidal detachment: new cause of an old disease JOHN W. HARBISSE, DUPONT GUERRY, AND HERBERT WIESINGER *page* 483

Waardenburg syndrome with a fixed dilated pupil NATHANEL LAOR AND AMOS D. KORCZYN *page* 491

Edge-light pupil cycle time STEPHEN D. MILLER AND H. STANLEY THOMPSON *page* 495

Book reviews *page* 501
