The extraordinary technical developments in molecular biology over the past few years, and the equally rapid advances in understanding of cell biology, will almost certainly result in far reaching changes in medical research and practice. In this collection of articles experts in molecular and cell biology provide the background information to give clinicians an insight into the way in which the medical sciences may be moving over the next few years and into the exciting possibilities opening up for the treatment of genetic disorders, cancer, and the common illnesses of Western society such as degenerative vascular disease and diabetes.

ABC OF EYES

BMJ

A R ELKINGTON P T KHAW

Detailed descriptions of the symptoms and signs of common disorders of the eye together with **over 120 colour illustrations** make the *ABC of Eyes* an invaluable aid to diagnosis. Written by A R Elkington, senior lecturer and consultant ophthalmologist, University of Southampton, and P T Khaw, senior registrar in ophthalmology, Moorfields Eye Hospital, London, the book also provides guidance on when to refer to a specialist, and how urgently.

Busy general practitioners will find this a useful reference book for the surgery while for medical students, optometrists, and nurses (particularly ophthalmic nurses) it offers a concise practical introduction to ophthalmology.

Chapters include:

History and examination • Red eye • Eyelid and lacrimal disorders • Injuries to the eye • Cataracts • Refractive errors • The glaucomas • Squint • The eye and the nervous system.

Two new titles from the BMJ's series of books of general interest by medical writers

Portraits from Memory by Sir James Howie

One of the *BMJ*'s most popular series, Sir James Howie's *Portraits from Memory* is now published as a complete collection. For this Memoir Club edition the author has provided three new portraits, an introductory self portrait, and an appendix in which he comments on the points raised in the widespread correspondence that resulted from the portraits' publication.

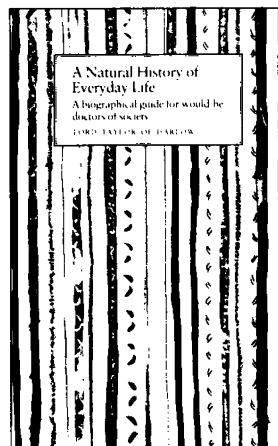

Sir James Howie's distinguished career has included appointments as professor of bacteriology in the University of Glasgow, director of the Public Health Laboratory Service, president of the Royal College of Pathologists, and president of the British Medical Association. This book is not about himself, however, but about the memorable personalities he has known in microbiology and in military, hospital, and academic medicine. Essential reading for all students of human nature.

Price: Inland £14.95; Abroad £17.50; USA \$29.00. BMA members: Inland £13.95; Abroad £16.50; USA \$27.00.

A Natural History of Everyday Life: A biographical guide for would-be doctors of society by Lord Taylor of Harlow

As doctor, politician, and administrator the late Lord Taylor was a key figure in the formative years of some varied institutions: the National Health Service; Harlow New Town (playing an important part in its development and in its industrial health service); and the Memorial University of Newfoundland, of which he was the first president and vice-chancellor. He also laid the foundations of Medicare in Canada by his skilful negotiations to resolve the doctors' strike in Saskatchewan. In his lively and provocative memoirs Lord Taylor relates his "personal voyage" from childhood, through student days at St. Thomas's to his later career in public life, providing on the way innumerable pungent observations together with his views on the origins of some of society's ills—and their cures.

Price: Inland £19.95; Abroad £24.00; USA \$40.00
BMA members: Inland £18.95; Abroad £23.00; USA \$38.00.
