

Which is the natural tear and which is Tears Naturale™?

Tears Naturale ophthalmic solution was developed exclusively for dry eye treatment, alleviating dry spots associated with both aqueous and mucin deficiencies.

This close similarity to the action of natural tears is made possible by the unique Duasorb™ polymer system contained in Tears Naturale.

The Duasorb polymer system

mimics the action of conjunctival mucin by increasing wettability of the ocular surface and stabilising the tear film.

The low viscosity and high retention time of Tears Naturale helps to ensure patient comfort, patient satisfaction and, therefore, patient compliance.

Tears Naturale: so near to tears.

Presentation: Dextran 70 0.1% and Hydroxypropyl Methylcellulose 0.3% in a sterile solution preserved with Benzalkonium Chloride BP 0.01% and Disodium Edetate BP 0.05%. **Clinical Uses:** A soothing solution for use as an artificial tear and lubricant in the relief of dry eye syndromes associated with deficient tear secretion or deficient mucous. **Dosage and Administration:** Instill 1 or 2 drops into the eye(s), as frequently as to relieve eye irritation symptoms. **Contra-indications:** The product contains Benzalkonium Chloride, and should not be used when soft contact lenses are being worn. **Precautions:** If irritation persists, discontinue use. **Product Licence No:** 0649 0031.

TOPCON TRC - NW3 NON-MYDRIATIC RETINAL CAMERA

In keeping with our philosophy of supplying only top quality equipment, Keeler are now the exclusive distributors for TOPCON.

The fully integrated design of the Topcon TRC-NW3 from Keeler makes it the perfect choice for top quality retinal photography. Featuring an omnidirectional joystick control and a choice of 45° or 20° coverage at a touch, it is fast and easy to use, requiring minimal operator training. The TRC-NW3 produces exceptionally sharp, large diameter 74mm photographs on fine quality Polaroid film.

- Monitor and controls in line with patient to simplify operation.
- Operation possible without complete darkness, as only 4mm pupil dilation is required.
- Full-frame 74mm fine resolution Polaroid film used.
- Auto-wind Polaroid film back incorporates LED operating display.
- Adjustable 3-step flash system allows choice of intensity.
- Automatic internal fixation lamps shift for left/right coverage.
- Green external fixation available.
