

Many medical journals, including the *British Medical Journal*, now expect scientific papers submitted to them to contain confidence intervals when appropriate. Why? what are they? and how do you calculate them? *Statistics with Confidence* tells you. A clear explanation of the reasons for using confidence intervals is followed by detailed presentation of methods of calculation, including numerous worked examples and specially compiled tables. To make things even easier, a computer programme, Confidence Interval Analysis (CIA), for calculating confidence intervals, has been specially designed by Martin Gardner and details are available from the Publishing Department, *British Medical Journal*.

Eighth edition

The statistical testing of data is indispensable in many types of medical investigation and a help on countless occasions in clinical practice. This book provides step by step instruction. Subjects covered include standard deviation, χ^2 tests, t tests, non-parametric tests, and correlation. The book includes sections on Fisher's exact probability test and rank correlation not published in the original *BMJ* series. Methods specially adapted to pocket calculators.

Price: Inland £3.00;
Abroad £4.50
BMA members: Inland £2.50;
Abroad: £4.00

"He uses statistics as a drunken man uses lamp-posts — for support rather than illumination." *

Let the *BMJ* throw light on your methods and help your results stand up

* *Andrew Lang*

Fourth impression

No doctor can afford to ignore statistics: most modern medical research uses statistics. This important and authoritative book provides clear information on designing studies, applying statistical techniques, and interpreting studies that use statistics. It can be easily understood by those with no statistical training and should be read by all those who want to keep abreast of new developments.

Price: Inland £8.95;
Abroad £11.00
BMA members: Inland £7.45;
Abroad: £10.00

Second edition

Epidemiology has its own techniques of data collection and interpretation and its necessary jargon of technical terms, and in *Epidemiology for the Uninitiated* Professors Geoffrey Rose and David Barker guide the novice expertly through the theory and practical pitfalls. The second edition of this popular *BMJ* handbook has been revised to include further details of epidemiological methods and some of their more dramatic applications, such as the investigations on the Spanish cooking oil epidemic, and AIDS.

Price: Inland £3.95;
Abroad £5.50
BMA members: Inland £3.45;
Abroad: £5.00

DID YOU TAKE YOUR DROPS?

What can you give a patient as well as

Getting patients to comply with complicated dose regimens can be a frustrating business.

Which is why Allergan has developed Betagan, the beta blocker most patients only need to take once a day.

This is possible because of Betagan's sustained activity over 24 hours,¹ which has been

shown to be effective in controlling the intraocular pressure of up to 81% of patients on a once daily dose.²

Betagan offers new hope of improved compliance for a whole range of glaucoma patients such as the elderly or arthritic, those with impaired vision, or those who live alone.

▼ PRESCRIBING INFORMATION

PRESENTATION: Sterile ophthalmic solution containing levobunolol hydrochloride 0.5% (w/v).

ACTION: Beta-adrenergic blocking agent.

INDICATIONS: Reduction of intra-

ocular pressure in chronic open-angle glaucoma and ocular hypertension.

CONTRA-INDICATIONS, PRECAUTIONS AND WARNINGS:

Contra-indications: Bronchial asthma; history of bronchial asthma; chronic

obstructive pulmonary disease; sinus bradycardia; second and third degree atrioventricular block; cardiac failure; cardiogenic shock; hypersensitivity to any component. Caution in labile diabetes and in patients receiving oral beta-adrenergic

DON'T ASK ME.

who suffers from amnesia glaucoma?

What's more you also have the option of prescribing Betagan at a twice daily dosage for those patients who require additional control.

So next time you're looking for a simple but flexible treatment for open angle glaucoma, consider Betagan.

It's a name worth remembering.

An opportunity exists for
**TWO SENIOR REGISTRARS
WHO ARE FELLOWS OF
THE COLLEGE OF
OPHTHALMOLOGISTS**

or its equivalent to serve as surgeons at
St. John Ophthalmic Hospital,
Jerusalem

for a period of a year, a post recognised for
accreditation in the United Kingdom.

The Hospital has 80 beds, with flats in the com-
pound which can house a family. 50,000 patients
mainly Moslems, attend each year and 5,000
major surgical procedures are performed. All
modern equipment is at the disposal of the surgical
staff. The outpatients department presents a high
incidence of pathological and traumatic lesions.

The salary offered will be the same as is being
earned by the successful candidate.

Fares each way for the surgeon and his family will
be paid by the Order. The Hospital is housed in a
compound which is safe for patients, staff and
children.

Applications should be made to Sir Stephen
Miller, KCVO, MD, FRCS, Hospitalier, The
Order of St. John, 1 Grosvenor Crescent,
London, SW1X 7EF.

ABC OF EYES

A R ELKINGTON P T KHAW

Detailed descriptions of the symptoms and signs of
common disorders of the eye together with **over 120
colour illustrations** make the *ABC of Eyes* an
invaluable aid to diagnosis.

Written by A R Elkington, senior lecturer and
consultant ophthalmologist, University of Southampton,
and P T Khaw, senior registrar in ophthalmology,
Moorfields Eye Hospital, London, the book also
provides guidance on when to refer to a specialist,
and how urgently.

Busy general practitioners will find this a useful
reference book for surgery while for medical
students, optometrists, and nurses (particularly
ophthalmic nurses) it offers a concise practical
introduction to ophthalmology.

Chapters include:

History and examination • Red eye • Eyelid and
lacrimal disorders • Injuries to the eye • Cataracts •
Refractive errors • The glaucomas • Squint • The eye
and the nervous system.
