Correction

Because of a printer’s error the wrong figure appeared as Figure 2 in the paper by Ono et al. that was published in the March issue of the journal (BJO 1995; 79: 270–6). The correct figure is given below.

Figure 2. Quantitative PCR of HTLV-1 provirus DNA in the samples. An autoradiogram of the membrane hybridisation of the PCR products (30 cycles) with internal oligomer probe, G3, is presented. The membrane was exposed to X-Omat AR film for 1 hour. (A) Fivefold dilution series of the positive control (5° to 5^-4 from lanes 1 to 5); (B) samples from HIV patients (lanes 6 to 10); (C) samples from asymptomatic carriers (lanes 11 to 13).
