Figure S2. Regression Model Building

VI & All-cause mortality

Model 1: base model

Model 2: fully adjusted model

Model 2 + frailty & disability

Model 3: mediation - direct pathway

Model 2 + fell

Model 4: mediation - indirect pathway

Model 2 + care-seeking & screening

Model 5: mediation - indirect pathway

Model 2 + mental & social well-being covariates

Model 6: mediation - indirect pathway

Adjusted for Age & Sex

Model 1 + demographic, SES, health status & behavioral confounders
